

Camera-based sensor system to find space in T2 car parking

MUMBAI. The Mumbai airport has installed a new parking guidance system at its multi-level car parking at Terminal 2, said the airport spokesperson on Thursday. The camera-based sensor system at T2 parking offers effortless parking and ensures enhanced security, the official said. “The sensor functions by offering real-time visual guidance through LEDs for every parking space. These LEDs use live colour-changing lights to accurately reflect the occupancy status of each individual parking bay,” said the airport official. “Furthermore, this technology operates with exceptional accuracy and high reliability in all conditions.” If a person forgets the location of his parked vehicle, the “Find My Car” option in the parking guidance system will help locate it. “This can be done by entering details like the licence plate number at the nearby kiosk,” the spokesperson said. The system has a real-time monitoring system, which offers video clips and images depicting parking occupancy. “Parking supervisors will utilise the heat map dashboard for up-to-the-minute insights into the parking area. The sensor enables customised zone parking, which defines distinct parking zones with unique LED colours. This approach contributes to more efficient parking management,” the airport said
